The Honorable Jocelyn G. Boyd  
Chief Clerk/Administrator  
**Public Service Commission of South Carolina**  
101 Executive Center Drive  
Columbia, South Carolina 29210

RE: Annual Review of Base Rates for Fuel Costs for Dominion Energy South Carolina, Incorporated (For Potential Increase or Decrease in Fuel Adjustment or Gas Adjustment); Docket No. 2021-2-E

Dear Ms. Boyd:

On February 9, 2021, the Dominion Energy South Carolina, Inc. ("DESC" or "Company") filed with the Public Service Commission of South Carolina ("Commission") its direct testimony and exhibits, where applicable, in the above-referenced matter. Subsequent to the filing, the Company discovered an error in the calculation of the avoided cost true-up related to the annual NEM excess payment for November 2019, which required a restatement of certain numbers on pages 10 through 12 of the direct testimony of Allen W. Rooks and on his Exhibit Nos. (AWR-6) and (AWR-7).

Enclosed for filing on behalf of DESC in the above-captioned docket is the Corrected Direct Testimony Allen W. Rooks and Corrected Exhibit Nos. (AWR-6) and (AWR-7). DESC is also providing a redlined copy of the Corrected Direct Testimony of Mr. Rooks so that the restated numbers can be easily identified.

By copy of this letter, we are serving the parties of record with a copy of Corrected Direct Testimony of Allen W. Rooks (both clean and redlined versions) and Corrected Exhibit Nos. (AWR-6) and (AWR-7) and attach a certificate of service to that effect.

If you have any questions, please advise.

Very truly yours,

A handwritten signature in blue ink that reads "Matthew W. Gissendanner".

Matthew W. Gissendanner

MWG/kms  
Enclosures

The Honorable Jocelyn G. Boyd

1 **CORRECTED DIRECT TESTIMONY OF**

2 **ALLEN W. ROOKS**

3 **ON BEHALF OF**

4 **DOMINION ENERGY SOUTH CAROLINA, INC.**

5 **DOCKET NO. 2021-2-E**

6  
7 **Q. PLEASE STATE YOUR NAME, BUSINESS ADDRESS, AND CURRENT**  
8 **POSITION.**

9 A. My name is Allen W. Rooks. My business address is 400 Otarre  
10 Parkway, Cayce, South Carolina 29033. I am employed by Dominion Energy  
11 Services (“DES”) as Manager of Regulation for Dominion Energy South  
12 Carolina, Inc. (“DESC” or the “Company”).  
13

14 **Q. DESCRIBE YOUR EDUCATIONAL BACKGROUND AND BUSINESS**  
15 **EXPERIENCE.**

16 A. I graduated from the University of South Carolina (“USC”) in May 1995  
17 with a Bachelor of Science Degree in Business Administration with a major in  
18 Management Science. In May 2002, I earned a Master of Business  
19 Administration Degree at USC. Since joining SCANA Corporation on a full-  
20 time basis in July 1996, I have held analytical positions within the Rates &  
21 Regulatory and Financial Planning Departments. I have participated in cost of  
22 service studies, rate development and design, financial planning and budgeting,

1 rate surveys, responses to regulatory information requests, and rate evaluation  
2 programs primarily for the Company's electric operations. I assumed my  
3 present position in April 2014. I am a member of the Southeastern Electric  
4 Exchange Rates and Regulation Section and served as Chairman of the group  
5 during the 2013 calendar year.

6

7 **Q. PLEASE BRIEFLY SUMMARIZE YOUR DUTIES WITH DESC.**

8 A. I am responsible for designing and administering the Company's electric  
9 rates and tariffs to comply with regulatory orders and relevant state statutes. An  
10 essential part of my responsibilities is supervising the calculation of the Electric  
11 Adjustment for Fuel, Variable Environmental & Avoided Capacity, and  
12 Distributed Energy Resource Costs.

13

14 **Q. HAVE YOU PREVIOUSLY PRESENTED TESTIMONY BEFORE THE**  
15 **PUBLIC SERVICE COMMISSION OF SOUTH CAROLINA**  
16 **(“COMMISSION”)?**

17 A. Yes, I have testified in each of the Company's Fuel Cost Proceedings  
18 since 2008.

19

20 **Q. WHAT IS THE PURPOSE OF YOUR TESTIMONY IN THIS**  
21 **PROCEEDING?**

22 A. The purpose of my testimony is to provide and discuss:

- 1       • The Company’s currently approved electric fuel cost factors;
- 2       • Actual and Projected data on Base Fuel Costs and Collection for the period
- 3       January 1, 2020, through April 30, 2022;
- 4       • Actual and Projected data on Variable Environmental & Avoided Capacity
- 5       Costs and Collection for the period January 1, 2020, through April 30, 2022;
- 6       • Actual and Projected data on Distributed Energy Resource (“DER”) Avoided
- 7       and DER Incremental Costs and Collection for the period January 1, 2020,
- 8       through April 30, 2022; and
- 9       • The Company’s proposed Base Fuel, Variable Environmental & Avoided
- 10      Capacity, DER Avoided, DER Incremental and Total Fuel Cost Factors for
- 11      retail electric customers for the period May 2021 through April 2022.

12

13   **Q.     WHAT ARE THE COMPANY’S CURRENTLY APPROVED ELECTRIC**

14   **FUEL COST FACTORS?**

15   A.       On April 30, 2020, by Order No. 2020-331, the Commission approved

16   Base ( $F_C$ ), Variable Environmental & Avoided Capacity ( $F_{EC}$ ), DER Avoided

17   ( $F_{AC}$ ), and DER Incremental ( $F_{IC}$ ) fuel components and Total Fuel Cost Factors

18   by customer class, which are summarized in the tables below:

19

| Class                  | Base Fuel Cost Component (cents/kWh) | Variable Environmental & Avoided Capacity Cost Component (cents/kWh) | DER Avoided Cost Component (cents/kWh) | Total Fuel Cost Factor (cents/kWh) |
|------------------------|--------------------------------------|--|--|------------------------------------|
| Residential            | 2.250                                | 0.071  | 0.038                                  | 2.359                              |
| Small General Service  | 2.250                                | 0.070  | 0.037                                  | 2.357                              |
| Medium General Service | 2.250                                | 0.057  | 0.030                                  | 2.337                              |
| Large General Service  | 2.250                                | 0.036  | 0.019                                  | 2.305                              |
| Lighting               | 2.250                                | --   | --                                     | 2.250                              |

1

| Class                    | DERP Incremental Cost Component (per Account per Month) |
|--------------------------|---|
| Residential              | \$1.00  |
| Small & Medium Gen. Svc. | \$5.85  |
| Large General Service    | \$100.00  |

2

3

### **BASE FUEL COST COMPONENT**

4

**Q. PLEASE BRIEFLY EXPLAIN THE TYPES OF COSTS THAT APPEAR IN THE BASE FUEL COST COMPONENT ( $F_C$ ).**

5

6 A.

Base fuel costs include traditional fuel costs, such as the cost of coal, natural gas, oil, nuclear fuel, fuel transportation, and fuel costs related to purchased power that are used to supply electricity.

7

8

9

**Q. PLEASE PROVIDE A SUMMARY OF THE COMPANY'S ACTUAL AND PROJECTED BASE FUEL COMPONENT COSTS.**

10

11 A.

Page 1 of Exhibit No. \_\_\_\_ (AWR-1) shows the actual totals for the Base Fuel Cost Component and over/under recovery of fuel revenue experienced by the Company for the months of January 2020 through December 2020, as well

12

13

14

1 as projections for January 2021 through April 2021. This exhibit shows the  
2 actual base fuel over-collected balance to be \$52,090,275 at December 31, 2020,  
3 and the projected over-collected balance to be \$44,697,895 at the end of April  
4 2021.

5 Page 2 of Exhibit No. \_\_\_\_ (AWR-1) shows the Company's Base Fuel  
6 Component forecast and projected recovery calculations by month for the period  
7 May 2021 through April 2022. This page reflects the monthly and cumulative  
8 over and under projected fuel cost collection expected by the Company using  
9 the Base Fuel Component that is calculated in Exhibit No. \_\_\_\_ (AWR-2). This  
10 Base Fuel Component of 2.413 cents per kWh is projected to recover all base  
11 fuel costs in the forecast period in addition to returning to customers the  
12 projected over-collected balance by the end of April 2022.

13  
14 **Q. HAVE ANY CARRYING COSTS BEEN APPLIED TO BASE FUEL**  
15 **COST BALANCES DURING THE ACTUAL PERIOD?**

16 A. No.

17  
18 **Q. WERE THERE ANY COMMISSION AUTHORIZED ADJUSTMENTS**  
19 **TO BASE FUEL COSTS DURING THE ACTUAL PERIOD?**

20 A. No.

**DEMAND ALLOCATIONS**

**Q. PLEASE DISCUSS THE DEMAND ALLOCATIONS USED TO ALLOCATE VARIABLE ENVIRONMENTAL, AVOIDED CAPACITY, AND DER COSTS PRESENTED ON EXHIBIT NOS. \_\_\_\_ (AWR-3-7, & 9).**

A. To allocate Variable Environmental & Avoided Capacity, DER Avoided, and DER Incremental costs to customer classes, the Company uses the same four-hour-band Coincident Peak methodology that has been approved by this Commission for over 30 years. It is also the same methodology that the Commission has approved for the allocation of DESC's variable environmental costs in each of its fuel cost proceedings since 2008.

The Company's Summer 2019 peak, which was used to allocate Variable Environmental & Avoided Capacity, and DER costs during the actual period of January 2020 through December 2020, occurred on July 18, 2019. Also shown on Exhibit No. \_\_\_\_ (AWR-3) is the Summer 2020 peak, which occurred on September 2, 2020, and was used to allocate Variable Environmental & Avoided Capacity, and DER costs during the 2021 - 2022 forecast months.

**VARIABLE ENVIRONMENTAL & AVOIDED CAPACITY COST**  
**COMPONENT**

**Q. WHAT TYPES OF COSTS ARE INCLUDED IN THE VARIABLE ENVIRONMENTAL & AVOIDED CAPACITY COST COMPONENT (F<sub>EC</sub>)?**

A. In 2007, the South Carolina General Assembly approved certain amendments to the Fuel Cost Recovery Statute (codified at S.C. Code Ann. § 58-27-865) which allowed for the recovery of certain variable environmental costs, such as ammonia, lime, limestone, urea, dibasic acid, and catalysts consumed in reducing or treating emissions as well as the cost of emission allowances for SO<sub>2</sub>, NO<sub>x</sub>, mercury, and particulates.

Furthermore, the Commission approved the recovery of Avoided Capacity Costs in this Component in Order No. 2015-306. These avoided capacity costs are separate and independent from the Company's avoided costs related to DER programs, which are recovered through a separate component that is discussed later in this testimony.

**Q. PLEASE SUMMARIZE THE COMPANY'S ACTUAL AND PROJECTED VARIABLE ENVIRONMENTAL & AVOIDED CAPACITY COMPONENT COSTS.**

A. Exhibit No. \_\_\_\_ (AWR-4) shows the Company's actual variable environmental & avoided capacity costs, the allocation of those costs to retail

1 customer classes, the variable environmental & avoided capacity cost-related  
2 revenue recovered by class, and the corresponding over/under recovery by  
3 month and on a cumulative basis for the months of January 2020 through  
4 December 2020. It also details projections for this same information during the  
5 months of January 2021 through April 2021. The cumulative over-collected  
6 balances projected at April 30, 2021, are \$2,521,426 for the Residential rate  
7 class, \$947,652 for the Small General Service rate class, \$443,951 for the  
8 Medium General Service rate class, and \$960,878 for the Large General Service  
9 rate class.

10 Exhibit No. \_\_\_\_ (AWR-5) shows the Company's forecasted variable  
11 environmental & avoided capacity costs and the allocation of those costs to retail  
12 customer classes for the period of May 2021 through April 2022. This exhibit  
13 also details forecasted sales data by class, over/under recovery computations,  
14 and calculates the projected Variable Environmental & Avoided Capacity Cost  
15 Components per kWh for the same period. The (FEC) Components produced by  
16 these calculations are projected to recover all costs and are as follows: 0.068  
17 cents per kWh for the Residential rate class; 0.058 cents per kWh for the Small  
18 General Service rate class; 0.046 cents per kWh for the Medium General Service  
19 rate class; and 0.031 cents per kWh for the Large General Service rate class.  
20 Updating these components, as shown in Exhibit No. \_\_\_\_ (AWR-5), is projected  
21 to produce a cumulative over-collected balance of \$80,534 at April 30, 2022.  
22

**DISTRIBUTED ENERGY RESOURCE PROGRAM (“DERP”)**

**COMPONENTS**

**Q. PLEASE BRIEFLY DISCUSS THE COSTS INCLUDED IN THESE COMPONENTS?**

A. In Docket No. 2016-2-E, the Commission approved two separate components for the recovery of costs associated with DESC’s approved DER programs under South Carolina Act 236 of 2014, also known as the Distributed Energy Resource Program Act.

The DERP Avoided Cost Component ( $F_{AC}$ ) includes avoided costs related to the Company’s approved Bill Credit Agreement (“BCA”), Utility Scale, and Community Solar programs. It also includes Excess Net Energy Metering (“NEM”) Avoided Cost Payments, which are made each year during the November billing month. This Component is allocated 100% to retail customers based upon each class’ pro-rata share of the prior year firm peak demand and is billed on a per kWh basis.

The DERP Incremental Cost Component ( $F_{IC}$ ) includes incentives, labor, and other expenses associated with deploying the Company’s DER programs. This Component is also allocated 100% to retail customers based upon each class’ pro-rata share of the prior year firm peak demand and is billed on a per account basis each month, to aid in demonstrating compliance with the caps set forth in S.C. Code Ann. § 58-39-150.

1 A more detailed discussion of the Company's DER programs is set forth  
2 in the Direct Testimony of Company Witness Mark Furtick.

3  
4 **Q. PLEASE PROVIDE A SUMMARY OF THE COMPANY'S ACTUAL**  
5 **AND FORECASTED DER PROGRAM COSTS.**

6 A. Corrected Exhibit No. \_\_\_\_ (AWR-6) details the Company's actual DER  
7 avoided costs, the allocation of those costs to retail customer classes, the DER  
8 avoided cost-related revenue recovered by class, and the corresponding  
9 over/under recovery by month and on a cumulative basis for the months of  
10 January 2020 through December 2020. It also details projections for this same  
11 information during the months of January 2021 through April 2021. The  
12 cumulative over-collected balances projected at April 30, 2021, are \$310,917 for  
13 the Residential rate class, \$103,064 for the Small General Service rate class,  
14 \$46,854 for the Medium General Service rate class, and \$47,036 for the Large  
15 General Service rate class.

16 Corrected Exhibit No. \_\_\_\_ (AWR-7) shows the Company's forecasted  
17 DER avoided costs and the allocation of those costs to retail customer classes  
18 for the period of May 2021 through April 2022. This exhibit also details  
19 forecasted sales data by class, over/under recovery computations, and calculates  
20 the projected DER Avoided Cost Components per kWh for the same period. The  
21 (F<sub>AC</sub>) Components produced by these calculations are projected to recover all  
22 costs and are as follows: 0.042 cents per kWh for the Residential rate class;

1 0.037 cents per kWh for the Small General Service rate class; 0.029 cents per  
2 kWh for the Medium General Service rate class; and 0.020 cents per kWh for  
3 the Large General Service rate class. Updating these components, as shown in  
4 Corrected Exhibit No. \_\_\_\_ (AWR-7), is projected to produce a cumulative  
5 under-collected balance of \$4,242 at April 30, 2022.

6 Exhibit No. \_\_\_\_ (AWR-8) shows details of the actual and forecasted DER  
7 Incremental Costs by program and over/under revenue recovery calculations for  
8 the period of January 2020 through April 2021. Exhibit No. \_\_\_\_ (AWR-9)  
9 shows the costs allocated to classes based upon firm peak demand data and then  
10 divided by the number of accounts to arrive at the respective DER Incremental  
11 Cost Components (F<sub>IC</sub>) by class, which, subject to the statutory caps are: \$1.00  
12 per account per month for the Residential rate class; \$6.17 per account per month  
13 for the Small/Medium General Service rate class; and \$100.00 per account per  
14 month for the Large General Service rate class.

1 **Q. DOES THE PROPOSED ADJUSTMENT TO FUEL RATES SET TO GO**  
2 **INTO EFFECT WITH THE FIRST BILLING CYCLE OF MAY 2021**  
3 **REFLECT THE TRUE-UP OF THE UPDATED AVOIDED COSTS,**  
4 **VARIABLE INTEGRATION CHARGES, AND NEM METHODOLOGY**  
5 **COSTS IN DOCKET NO. 2019-184-E WITH THOSE COSTS**  
6 **REMAINING IN EFFECT SINCE DOCKET NO. 2018-2-E?**

7 A. Yes. The Company plans to book this true-up during the first quarter of  
8 2021 and has included the true-up adjustments in its DER Avoided and  
9 Incremental cost forecasts shown on Exhibit Nos. AWR-6 and AWR-8. The  
10 effect of the true-up will be to increase DER Avoided Costs by \$48,627 and  
11 increase DER Incremental Costs by \$250,939.

12  
13 **PROPOSED FUEL COST FACTORS**

14 **Q. WHAT IS THE COMPANY'S PROPOSAL FOR ITS FUEL COST**  
15 **FACTORS OVER THE NEXT TWELVE-MONTH PERIOD?**

16 A. In this proceeding, the Company proposes to increase its Base Fuel  
17 Component to 2.413 cents per kWh for the period of May 2021 through April  
18 2022. The Base Fuel Component proposed above is calculated and shown on  
19 Exhibit No. \_\_\_\_ (AWR-2).

20 As shown in Exhibit No. \_\_\_\_ (AWR-5), the Company is proposing in this  
21 proceeding that the Variable Environmental & Avoided Capacity Cost

Components be reduced for all classes of customers for the May 2021 – April 2022 time period as previously discussed.

The derivation of the Company's proposed DER Avoided Costs Component ( $F_{AC}$ ) for the May 2021 – April 2022 time period is shown on Corrected Exhibit No. \_\_\_\_ (AWR-7) and reflects a slight increase for the Residential and Large General Service customer classes, a slight decrease for the Medium General Service customer class, while maintaining the component at the current amount for the Small General Service customer class.

The resulting Total Fuel Cost Factors per kWh, as shown on Exhibit No. \_\_\_\_ (AWR-10), are presented in the table below:

| Class               | Base Fuel Cost Component (cents/kWh) | Variable Environmental & Avoided Capacity Cost Component (cents/kWh) | DER Avoided Cost Component (cents/kWh) | Total Fuel Cost Factor (cents/kWh) |
|---------------------|--------------------------------------|--|--|------------------------------------|
| Residential         | 2.413                                | 0.068  | 0.042                                  | 2.523                              |
| Small General Svc.  | 2.413                                | 0.058  | 0.037                                  | 2.508                              |
| Medium General Svc. | 2.413                                | 0.046  | 0.029                                  | 2.488                              |
| Large General Svc.  | 2.413                                | 0.031  | 0.020                                  | 2.464                              |
| Lighting            | 2.413                                | --   | --                                     | 2.413                              |

In addition to the per kWh factors shown above, the Company is also proposing to increase its DER Incremental Cost Component ( $F_{IC}$ ) per account per month to \$6.17 for Small/Medium General Service customers. The per account per month fee of \$1.00 for Residential and \$100.00 for Large General Service customers will remain unchanged to comply with the DERP Act caps.

1 The calculation of this component is shown on Exhibit No. \_\_\_\_ (AWR-9) and  
2 all components are summarized on Exhibit No. \_\_\_\_ (AWR-10).

3  
4 **Q. WHAT IMPACT WILL THE COMPANY'S SPRING 2021 PROPOSALS**  
5 **HAVE ON A RESIDENTIAL ELECTRIC CUSTOMER'S BILL?**

6 A. When combining the Company's 2021 proposals for Fuel, DSM, and  
7 Pension cost recovery, the average monthly bill for residential customers using  
8 1,000 kWh per month would increase from \$122.31 to \$124.11.<sup>1</sup> This \$1.80 per  
9 month increase, or 1.47%, would become effective with the first billing cycle of  
10 May 2021. The impacts of each individual proposal on the average residential  
11 bill are summarized below:

12 Fuel – The total fuel cost factor updates proposed herein would increase  
13 the 1,000 kWh residential monthly bill by \$1.60 per month.

14 DSM – The Company's proposed DSM Rider Update filed on January  
15 29, 2021 would increase a residential customer's bill by \$0.23 per month per  
16 1,000 kWh of usage.

17 Pension – The Company's filing on February 9, 2021 to reduce its  
18 Pension Costs Component Rider would decrease a residential customer's bill by  
19 \$0.03 per month per 1,000 kWh of usage.

---

<sup>1</sup> The actual change in the Fuel, DSM, and Pension cost factors equates to a \$1.86 per month increase in the 1,000 kWh residential electric bill, but the application of the Tax Rider approved in the Commission Order No. 2018-804 reduces the impact to a \$1.80 increase. Individually, the Fuel increase is reduced from \$1.65 to \$1.60; the DSM increase is reduced from \$0.24 to \$0.23; and the Pension decrease would remain \$0.03, because the Tax Rider does not reduce it enough to round down.

**RATE SCHEDULES**

**Q. PLEASE EXPLAIN EXHIBIT NO. \_\_\_\_ (AWR-11).**

A. The Company hereby submits for Commission approval an updated version of its fuel cost recovery tariff sheet, entitled “Adjustment for Fuel, Variable Environmental & Avoided Capacity, and Distributed Energy Resource Costs” (“Fuel Tariff”) as Exhibit No. \_\_\_\_ (AWR-11).

**Q. PLEASE EXPLAIN EXHIBIT NOS. \_\_\_\_ (AWR-12), (AWR-13), (AWR-14), AND (AWR-15)**

A. The direct testimony of Company Witness Eric Bell enumerates the current component values for the Net Energy Metering DER Methodology approved in Docket No. 2014-246-E. Redline Exhibit Nos. \_\_\_\_ (AWR-12) and (AWR-14) show that the Company’s current “Rider to Retail Rates – [Second & Third] Net Energy Metering for Renewable Energy Facilities” (“NEM Rider”) “Total Value of NEM Distributed Energy Resource,” as described in Commission Order No. 2015-194 has been updated on page 3, paragraph 3, under “General Provisions” of the Rider. Exhibit Nos. \_\_\_\_ (AWR-13) and (AWR-15) are the clean versions of the Second and Third NEM Riders which the Company hereby submits for approval in this Docket.

1 **Q. WHAT ADDITIONAL REQUEST WITH RESPECT TO RATE**  
2 **SCHEDULES IS THE COMPANY MAKING IN THIS PROCEEDING?**

3 A. The Company's "Rider to Residential Rates and Time-of-Use Demand  
4 Rate 28 – Net Metering for Renewable Energy Facilities" terminated on  
5 December 31, 2020, and as stated by Company witness Furtick, all customers  
6 taking service under this Rider have been transitioned to other rate schedules,  
7 for which they are eligible. As there are now no customers on the Rider, and no  
8 new participants can be added to the Rider, DESC would respectfully request  
9 that the Commission terminate this Rider, so that it can remove it from its list of  
10 rate schedules and its website.

11  
12 **CONCLUSION**

13 **Q. WHAT REQUESTS DOES THE COMPANY MAKE OF THE**  
14 **COMMISSION IN THIS PROCEEDING?**

15 A. DESC respectfully requests that the Commission approve the tariff sheet  
16 entitled Adjustment for Fuel, Variable Environmental & Avoided Capacity, and  
17 Distributed Energy Resource Costs which is submitted as Exhibit No. \_\_\_\_  
18 (AWR-11), as well as the Base Fuel Component ( $F_C$ ), Variable Environmental  
19 & Avoided Capacity Cost Component ( $F_{EC}$ ), DER Avoided Cost Component  
20 ( $F_{AC}$ ), DER Incremental Costs Component ( $F_{IC}$ ), and Total Fuel Cost Factors  
21 shown therein. The Company also requests that these factors be effective for all

1 retail electric customer classes for bills rendered on and after the first billing  
2 cycle of May 2021 and continuing through the billing month of April 2022.

3 Further, the Company respectfully requests that the Commission approve  
4 the tariff sheets attached as Exhibit Nos. \_\_\_\_ (AWR-13) and (AWR-15) for  
5 updates to its net energy metering riders, as well as the termination of its Rider  
6 to Residential Rates and Time-of-Use Demand Rate 28.

7 Finally, the Company respectfully requests that the Commission issue an  
8 order finding that during the review period DESC's fuel purchasing practices,  
9 plant operations, and fuel inventory management were reasonable and prudent.

10

11 **Q. DOES THIS CONCLUDE YOUR DIRECT TESTIMONY?**

12 A. Yes.

**DOMINION ENERGY SOUTH CAROLINA**  
**SUMMARY OF DISTRIBUTED ENERGY RESOURCE PROGRAM AVOIDED COSTS**  
**JANUARY 2020 - APRIL 2021**

**CORRECTED DIRECT TESTIMONY OF**

**ALLEN W. ROOKS**

**ON BEHALF OF**

**DOMINION ENERGY SOUTH CAROLINA, INC.**

**DOCKET NO. 2021-2-E**

**Q. PLEASE STATE YOUR NAME, BUSINESS ADDRESS, AND CURRENT POSITION.**

A. My name is Allen W. Rooks. My business address is 400 Otarre Parkway, Cayce, South Carolina 29033. I am employed by Dominion Energy Services (“DES”) as Manager of Regulation for Dominion Energy South Carolina, Inc. (“DESC” or the “Company”).

**Q. DESCRIBE YOUR EDUCATIONAL BACKGROUND AND BUSINESS EXPERIENCE.**

A. I graduated from the University of South Carolina (“USC”) in May 1995 with a Bachelor of Science Degree in Business Administration with a major in Management Science. In May 2002, I earned a Master of Business Administration Degree at USC. Since joining SCANA Corporation on a full-time basis in July 1996, I have held analytical positions within the Rates & Regulatory and Financial Planning Departments. I have participated in cost of service studies, rate development and design, financial planning and budgeting,

1 rate surveys, responses to regulatory information requests, and rate evaluation  
2 programs primarily for the Company's electric operations. I assumed my  
3 present position in April 2014. I am a member of the Southeastern Electric  
4 Exchange Rates and Regulation Section and served as Chairman of the group  
5 during the 2013 calendar year.

6

7 **Q. PLEASE BRIEFLY SUMMARIZE YOUR DUTIES WITH DESC.**

8 A. I am responsible for designing and administering the Company's electric  
9 rates and tariffs to comply with regulatory orders and relevant state statutes. An  
10 essential part of my responsibilities is supervising the calculation of the Electric  
11 Adjustment for Fuel, Variable Environmental & Avoided Capacity, and  
12 Distributed Energy Resource Costs.

13

14 **Q. HAVE YOU PREVIOUSLY PRESENTED TESTIMONY BEFORE THE**  
15 **PUBLIC SERVICE COMMISSION OF SOUTH CAROLINA**  
16 **(“COMMISSION”)?**

17 A. Yes, I have testified in each of the Company's Fuel Cost Proceedings  
18 since 2008.

19

20 **Q. WHAT IS THE PURPOSE OF YOUR TESTIMONY IN THIS**  
21 **PROCEEDING?**

22 A. The purpose of my testimony is to provide and discuss:

- 1       • The Company’s currently approved electric fuel cost factors;
- 2       • Actual and Projected data on Base Fuel Costs and Collection for the period
- 3       January 1, 2020, through April 30, 2022;
- 4       • Actual and Projected data on Variable Environmental & Avoided Capacity
- 5       Costs and Collection for the period January 1, 2020, through April 30, 2022;
- 6       • Actual and Projected data on Distributed Energy Resource (“DER”) Avoided
- 7       and DER Incremental Costs and Collection for the period January 1, 2020,
- 8       through April 30, 2022; and
- 9       • The Company’s proposed Base Fuel, Variable Environmental & Avoided
- 10      Capacity, DER Avoided, DER Incremental and Total Fuel Cost Factors for
- 11      retail electric customers for the period May 2021 through April 2022.

12

13   **Q.     WHAT ARE THE COMPANY’S CURRENTLY APPROVED ELECTRIC**

14   **FUEL COST FACTORS?**

15   A.       On April 30, 2020, by Order No. 2020-331, the Commission approved

16   Base ( $F_C$ ), Variable Environmental & Avoided Capacity ( $F_{EC}$ ), DER Avoided

17   ( $F_{AC}$ ), and DER Incremental ( $F_{IC}$ ) fuel components and Total Fuel Cost Factors

18   by customer class, which are summarized in the tables below:

19

| Class                  | Base Fuel Cost Component (cents/kWh) | Variable Environmental & Avoided Capacity Cost Component (cents/kWh) | DER Avoided Cost Component (cents/kWh) | Total Fuel Cost Factor (cents/kWh) |
|------------------------|--------------------------------------|--|--|------------------------------------|
| Residential            | 2.250                                | 0.071  | 0.038                                  | 2.359                              |
| Small General Service  | 2.250                                | 0.070  | 0.037                                  | 2.357                              |
| Medium General Service | 2.250                                | 0.057  | 0.030                                  | 2.337                              |
| Large General Service  | 2.250                                | 0.036  | 0.019                                  | 2.305                              |
| Lighting               | 2.250                                | --   | --                                     | 2.250                              |

1

| Class                    | DERP Incremental Cost Component (per Account per Month) |
|--------------------------|---|
| Residential              | \$1.00  |
| Small & Medium Gen. Svc. | \$5.85  |
| Large General Service    | \$100.00  |

2

3

### **BASE FUEL COST COMPONENT**

4 **Q. PLEASE BRIEFLY EXPLAIN THE TYPES OF COSTS THAT APPEAR**  
5 **IN THE BASE FUEL COST COMPONENT ( $F_C$ ).**

6 A. Base fuel costs include traditional fuel costs, such as the cost of coal,  
7 natural gas, oil, nuclear fuel, fuel transportation, and fuel costs related to  
8 purchased power that are used to supply electricity.

9

10 **Q. PLEASE PROVIDE A SUMMARY OF THE COMPANY'S ACTUAL**  
11 **AND PROJECTED BASE FUEL COMPONENT COSTS.**

12 A. Page 1 of Exhibit No. \_\_\_\_ (AWR-1) shows the actual totals for the Base  
13 Fuel Cost Component and over/under recovery of fuel revenue experienced by  
14 the Company for the months of January 2020 through December 2020, as well

1 as projections for January 2021 through April 2021. This exhibit shows the  
2 actual base fuel over-collected balance to be \$52,090,275 at December 31, 2020,  
3 and the projected over-collected balance to be \$44,697,895 at the end of April  
4 2021.

5 Page 2 of Exhibit No. \_\_\_\_ (AWR-1) shows the Company's Base Fuel  
6 Component forecast and projected recovery calculations by month for the period  
7 May 2021 through April 2022. This page reflects the monthly and cumulative  
8 over and under projected fuel cost collection expected by the Company using  
9 the Base Fuel Component that is calculated in Exhibit No. \_\_\_\_ (AWR-2). This  
10 Base Fuel Component of 2.413 cents per kWh is projected to recover all base  
11 fuel costs in the forecast period in addition to returning to customers the  
12 projected over-collected balance by the end of April 2022.

13  
14 **Q. HAVE ANY CARRYING COSTS BEEN APPLIED TO BASE FUEL**  
15 **COST BALANCES DURING THE ACTUAL PERIOD?**

16 A. No.

17  
18 **Q. WERE THERE ANY COMMISSION AUTHORIZED ADJUSTMENTS**  
19 **TO BASE FUEL COSTS DURING THE ACTUAL PERIOD?**

20 A. No.

**DEMAND ALLOCATIONS**

**Q. PLEASE DISCUSS THE DEMAND ALLOCATIONS USED TO ALLOCATE VARIABLE ENVIRONMENTAL, AVOIDED CAPACITY, AND DER COSTS PRESENTED ON EXHIBIT NOS. \_\_\_\_ (AWR-3-7, & 9).**

A. To allocate Variable Environmental & Avoided Capacity, DER Avoided, and DER Incremental costs to customer classes, the Company uses the same four-hour-band Coincident Peak methodology that has been approved by this Commission for over 30 years. It is also the same methodology that the Commission has approved for the allocation of DESC's variable environmental costs in each of its fuel cost proceedings since 2008.

The Company's Summer 2019 peak, which was used to allocate Variable Environmental & Avoided Capacity, and DER costs during the actual period of January 2020 through December 2020, occurred on July 18, 2019. Also shown on Exhibit No. \_\_\_\_ (AWR-3) is the Summer 2020 peak, which occurred on September 2, 2020, and was used to allocate Variable Environmental & Avoided Capacity, and DER costs during the 2021 - 2022 forecast months.

**VARIABLE ENVIRONMENTAL & AVOIDED CAPACITY COST**  
**COMPONENT**

**Q. WHAT TYPES OF COSTS ARE INCLUDED IN THE VARIABLE ENVIRONMENTAL & AVOIDED CAPACITY COST COMPONENT (F<sub>EC</sub>)?**

A. In 2007, the South Carolina General Assembly approved certain amendments to the Fuel Cost Recovery Statute (codified at S.C. Code Ann. § 58-27-865) which allowed for the recovery of certain variable environmental costs, such as ammonia, lime, limestone, urea, dibasic acid, and catalysts consumed in reducing or treating emissions as well as the cost of emission allowances for SO<sub>2</sub>, NO<sub>x</sub>, mercury, and particulates.

Furthermore, the Commission approved the recovery of Avoided Capacity Costs in this Component in Order No. 2015-306. These avoided capacity costs are separate and independent from the Company's avoided costs related to DER programs, which are recovered through a separate component that is discussed later in this testimony.

**Q. PLEASE SUMMARIZE THE COMPANY'S ACTUAL AND PROJECTED VARIABLE ENVIRONMENTAL & AVOIDED CAPACITY COMPONENT COSTS.**

A. Exhibit No. \_\_\_\_ (AWR-4) shows the Company's actual variable environmental & avoided capacity costs, the allocation of those costs to retail

1 customer classes, the variable environmental & avoided capacity cost-related  
2 revenue recovered by class, and the corresponding over/under recovery by  
3 month and on a cumulative basis for the months of January 2020 through  
4 December 2020. It also details projections for this same information during the  
5 months of January 2021 through April 2021. The cumulative over-collected  
6 balances projected at April 30, 2021, are \$2,521,426 for the Residential rate  
7 class, \$947,652 for the Small General Service rate class, \$443,951 for the  
8 Medium General Service rate class, and \$960,878 for the Large General Service  
9 rate class.

10 Exhibit No. \_\_\_\_ (AWR-5) shows the Company's forecasted variable  
11 environmental & avoided capacity costs and the allocation of those costs to retail  
12 customer classes for the period of May 2021 through April 2022. This exhibit  
13 also details forecasted sales data by class, over/under recovery computations,  
14 and calculates the projected Variable Environmental & Avoided Capacity Cost  
15 Components per kWh for the same period. The (FEC) Components produced by  
16 these calculations are projected to recover all costs and are as follows: 0.068  
17 cents per kWh for the Residential rate class; 0.058 cents per kWh for the Small  
18 General Service rate class; 0.046 cents per kWh for the Medium General Service  
19 rate class; and 0.031 cents per kWh for the Large General Service rate class.  
20 Updating these components, as shown in Exhibit No. \_\_\_\_ (AWR-5), is projected  
21 to produce a cumulative over-collected balance of \$80,534 at April 30, 2022.  
22

**DISTRIBUTED ENERGY RESOURCE PROGRAM (“DERP”)**

**COMPONENTS**

**Q. PLEASE BRIEFLY DISCUSS THE COSTS INCLUDED IN THESE COMPONENTS?**

A. In Docket No. 2016-2-E, the Commission approved two separate components for the recovery of costs associated with DESC’s approved DER programs under South Carolina Act 236 of 2014, also known as the Distributed Energy Resource Program Act.

The DERP Avoided Cost Component ( $F_{AC}$ ) includes avoided costs related to the Company’s approved Bill Credit Agreement (“BCA”), Utility Scale, and Community Solar programs. It also includes Excess Net Energy Metering (“NEM”) Avoided Cost Payments, which are made each year during the November billing month. This Component is allocated 100% to retail customers based upon each class’ pro-rata share of the prior year firm peak demand and is billed on a per kWh basis.

The DERP Incremental Cost Component ( $F_{IC}$ ) includes incentives, labor, and other expenses associated with deploying the Company’s DER programs. This Component is also allocated 100% to retail customers based upon each class’ pro-rata share of the prior year firm peak demand and is billed on a per account basis each month, to aid in demonstrating compliance with the caps set forth in S.C. Code Ann. § 58-39-150.

1 A more detailed discussion of the Company's DER programs is set forth  
2 in the Direct Testimony of Company Witness Mark Furtick.

3  
4 **Q. PLEASE PROVIDE A SUMMARY OF THE COMPANY'S ACTUAL**  
5 **AND FORECASTED DER PROGRAM COSTS.**

6 A. Corrected Exhibit No. \_\_\_\_ (AWR-6) details the Company's actual DER  
7 avoided costs, the allocation of those costs to retail customer classes, the DER  
8 avoided cost-related revenue recovered by class, and the corresponding  
9 over/under recovery by month and on a cumulative basis for the months of  
10 January 2020 through December 2020. It also details projections for this same  
11 information during the months of January 2021 through April 2021. The  
12 cumulative over-collected balances projected at April 30, 2021, are \$310,933917  
13 for the Residential rate class, \$103,079064 for the Small General Service rate  
14 class, \$46,857854 for the Medium General Service rate class, and \$47,043036  
15 for the Large General Service rate class.

16 Corrected Exhibit No. \_\_\_\_ (AWR-7) shows the Company's forecasted  
17 DER avoided costs and the allocation of those costs to retail customer classes  
18 for the period of May 2021 through April 2022. This exhibit also details  
19 forecasted sales data by class, over/under recovery computations, and calculates  
20 the projected DER Avoided Cost Components per kWh for the same period. The  
21 (F<sub>AC</sub>) Components produced by these calculations are projected to recover all  
22 costs and are as follows: 0.042 cents per kWh for the Residential rate class;

1 0.037 cents per kWh for the Small General Service rate class; 0.029 cents per  
2 kWh for the Medium General Service rate class; and 0.020 cents per kWh for  
3 the Large General Service rate class. Updating these components, as shown in  
4 Corrected Exhibit No. \_\_\_\_ (AWR-7), is projected to produce a cumulative  
5 under-collected balance of \$4,~~210~~242 at April 30, 2022.

6 Exhibit No. \_\_\_\_ (AWR-8) shows details of the actual and forecasted DER  
7 Incremental Costs by program and over/under revenue recovery calculations for  
8 the period of January 2020 through April 2021. Exhibit No. \_\_\_\_ (AWR-9)  
9 shows the costs allocated to classes based upon firm peak demand data and then  
10 divided by the number of accounts to arrive at the respective DER Incremental  
11 Cost Components (F<sub>IC</sub>) by class, which, subject to the statutory caps are: \$1.00  
12 per account per month for the Residential rate class; \$6.17 per account per month  
13 for the Small/Medium General Service rate class; and \$100.00 per account per  
14 month for the Large General Service rate class.

**Q. DOES THE PROPOSED ADJUSTMENT TO FUEL RATES SET TO GO INTO EFFECT WITH THE FIRST BILLING CYCLE OF MAY 2021 REFLECT THE TRUE-UP OF THE UPDATED AVOIDED COSTS, VARIABLE INTEGRATION CHARGES, AND NEM METHODOLOGY COSTS IN DOCKET NO. 2019-184-E WITH THOSE COSTS REMAINING IN EFFECT SINCE DOCKET NO. 2018-2-E?**

A. Yes. The Company plans to book this true-up during the first quarter of 2021 and has included the true-up adjustments in its DER Avoided and Incremental cost forecasts shown on Exhibit Nos. AWR-6 and AWR-8. The effect of the true-up will be to increase DER Avoided Costs by \$48,595,627 and increase DER Incremental Costs by \$250,939.

### **PROPOSED FUEL COST FACTORS**

**Q. WHAT IS THE COMPANY'S PROPOSAL FOR ITS FUEL COST FACTORS OVER THE NEXT TWELVE-MONTH PERIOD?**

A. In this proceeding, the Company proposes to increase its Base Fuel Component to 2.413 cents per kWh for the period of May 2021 through April 2022. The Base Fuel Component proposed above is calculated and shown on Exhibit No. \_\_\_\_ (AWR-2).

As shown in Exhibit No. \_\_\_\_ (AWR-5), the Company is proposing in this proceeding that the Variable Environmental & Avoided Capacity Cost

Components be reduced for all classes of customers for the May 2021 – April 2022 time period as previously discussed.

The derivation of the Company's proposed DER Avoided Costs Component ( $F_{AC}$ ) for the May 2021 – April 2022 time period is shown on Corrected Exhibit No. \_\_\_\_ (AWR-7) and reflects a slight increase for the Residential and Large General Service customer classes, a slight decrease for the Medium General Service customer class, while maintaining the component at the current amount for the Small General Service customer class.

The resulting Total Fuel Cost Factors per kWh, as shown on Exhibit No. \_\_\_\_ (AWR-10), are presented in the table below:

| Class               | Base Fuel Cost Component (cents/kWh) | Variable Environmental & Avoided Capacity Cost Component (cents/kWh) | DER Avoided Cost Component (cents/kWh) | Total Fuel Cost Factor (cents/kWh) |
|---------------------|--------------------------------------|--|--|------------------------------------|
| Residential         | 2.413                                | 0.068  | 0.042                                  | 2.523                              |
| Small General Svc.  | 2.413                                | 0.058  | 0.037                                  | 2.508                              |
| Medium General Svc. | 2.413                                | 0.046  | 0.029                                  | 2.488                              |
| Large General Svc.  | 2.413                                | 0.031  | 0.020                                  | 2.464                              |
| Lighting            | 2.413                                | --   | --                                     | 2.413                              |

In addition to the per kWh factors shown above, the Company is also proposing to increase its DER Incremental Cost Component ( $F_{IC}$ ) per account per month to \$6.17 for Small/Medium General Service customers. The per account per month fee of \$1.00 for Residential and \$100.00 for Large General Service customers will remain unchanged to comply with the DERP Act caps.

1 The calculation of this component is shown on Exhibit No. \_\_\_\_ (AWR-9) and  
 2 all components are summarized on Exhibit No. \_\_\_\_ (AWR-10).

3  
 4 **Q. WHAT IMPACT WILL THE COMPANY'S SPRING 2021 PROPOSALS**  
 5 **HAVE ON A RESIDENTIAL ELECTRIC CUSTOMER'S BILL?**

6 A. When combining the Company's 2021 proposals for Fuel, DSM, and  
 7 Pension cost recovery, the average monthly bill for residential customers using  
 8 1,000 kWh per month would increase from \$122.31 to \$124.11.<sup>1</sup> This \$1.80 per  
 9 month increase, or 1.47%, would become effective with the first billing cycle of  
 10 May 2021. The impacts of each individual proposal on the average residential  
 11 bill are summarized below:

12 Fuel – The total fuel cost factor updates proposed herein would increase  
 13 the 1,000 kWh residential monthly bill by \$1.60 per month.

14 DSM – The Company's proposed DSM Rider Update filed on January  
 15 29, 2021 would increase a residential customer's bill by \$0.23 per month per  
 16 1,000 kWh of usage.

17 Pension – The Company's filing on February 9, 2021 to reduce its  
 18 Pension Costs Component Rider would decrease a residential customer's bill by  
 19 \$0.03 per month per 1,000 kWh of usage.

---

<sup>1</sup> The actual change in the Fuel, DSM, and Pension cost factors equates to a \$1.86 per month increase in the 1,000 kWh residential electric bill, but the application of the Tax Rider approved in the Commission Order No. 2018-804 reduces the impact to a \$1.80 increase. Individually, the Fuel increase is reduced from \$1.65 to \$1.60; the DSM increase is reduced from \$0.24 to \$0.23; and the Pension decrease would remain \$0.03, because the Tax Rider does not reduce it enough to round down.

**RATE SCHEDULES**

**Q. PLEASE EXPLAIN EXHIBIT NO. \_\_\_\_ (AWR-11).**

A. The Company hereby submits for Commission approval an updated version of its fuel cost recovery tariff sheet, entitled “Adjustment for Fuel, Variable Environmental & Avoided Capacity, and Distributed Energy Resource Costs” (“Fuel Tariff”) as Exhibit No. \_\_\_\_ (AWR-11).

**Q. PLEASE EXPLAIN EXHIBIT NOS. \_\_\_\_ (AWR-12), (AWR-13), (AWR-14), AND (AWR-15)**

A. The direct testimony of Company Witness Eric Bell enumerates the current component values for the Net Energy Metering DER Methodology approved in Docket No. 2014-246-E. Redline Exhibit Nos. \_\_\_\_ (AWR-12) and (AWR-14) show that the Company’s current “Rider to Retail Rates – [Second & Third] Net Energy Metering for Renewable Energy Facilities” (“NEM Rider”) “Total Value of NEM Distributed Energy Resource,” as described in Commission Order No. 2015-194 has been updated on page 3, paragraph 3, under “General Provisions” of the Rider. Exhibit Nos. \_\_\_\_ (AWR-13) and (AWR-15) are the clean versions of the Second and Third NEM Riders which the Company hereby submits for approval in this Docket.

1 **Q. WHAT ADDITIONAL REQUEST WITH RESPECT TO RATE**  
2 **SCHEDULES IS THE COMPANY MAKING IN THIS PROCEEDING?**

3 A. The Company's "Rider to Residential Rates and Time-of-Use Demand  
4 Rate 28 – Net Metering for Renewable Energy Facilities" terminated on  
5 December 31, 2020, and as stated by Company witness Furtick, all customers  
6 taking service under this Rider have been transitioned to other rate schedules,  
7 for which they are eligible. As there are now no customers on the Rider, and no  
8 new participants can be added to the Rider, DESC would respectfully request  
9 that the Commission terminate this Rider, so that it can remove it from its list of  
10 rate schedules and its website.

11  
12 **CONCLUSION**

13 **Q. WHAT REQUESTS DOES THE COMPANY MAKE OF THE**  
14 **COMMISSION IN THIS PROCEEDING?**

15 A. DESC respectfully requests that the Commission approve the tariff sheet  
16 entitled Adjustment for Fuel, Variable Environmental & Avoided Capacity, and  
17 Distributed Energy Resource Costs which is submitted as Exhibit No. \_\_\_\_  
18 (AWR-11), as well as the Base Fuel Component ( $F_C$ ), Variable Environmental  
19 & Avoided Capacity Cost Component ( $F_{EC}$ ), DER Avoided Cost Component  
20 ( $F_{AC}$ ), DER Incremental Costs Component ( $F_{IC}$ ), and Total Fuel Cost Factors  
21 shown therein. The Company also requests that these factors be effective for all

1 retail electric customer classes for bills rendered on and after the first billing  
2 cycle of May 2021 and continuing through the billing month of April 2022.

3 Further, the Company respectfully requests that the Commission approve  
4 the tariff sheets attached as Exhibit Nos. \_\_\_\_ (AWR-13) and (AWR-15) for  
5 updates to its net energy metering riders, as well as the termination of its Rider  
6 to Residential Rates and Time-of-Use Demand Rate 28.

7 Finally, the Company respectfully requests that the Commission issue an  
8 order finding that during the review period DESC's fuel purchasing practices,  
9 plant operations, and fuel inventory management were reasonable and prudent.

10

11 **Q. DOES THIS CONCLUDE YOUR DIRECT TESTIMONY?**

12 A. Yes.

**BEFORE**  
**THE PUBLIC SERVICE COMMISSION OF**  
**SOUTH CAROLINA**

**DOCKET NO. 2021-2-E**
